

## AMENDMENTS TO THE SPECIFICATION

**Please amend the Abstract as follows:**

A method and server for distributing information to multiple users via a network is disclosed. In one embodiment, the method includes i) transmitting notice information to a registered user, ii) transmitting a designated Web page when requested by the registered user, iii) receiving, from the registered user, a request for forwarding the notice information to an unregistered user, iv) transmitting the notice information to the unregistered user, v) transmitting the Web page when requested by the unregistered user, and vi) issuing and storing a new user ID for the unregistered user if a request for registration is made via the Web page.
